

POWERING THE FUTURE OF GAMING WITH DATA INTELLIGENCE & AI

Valorem Reply drives digital transformation across gaming and entertainment, leveraging cloud, data, and AI to deliver results at a global scale. As a Microsoft Preferred Vendor and Solutions Partner, we help studios and publishers accelerate innovation, drive player engagement, and unlock new revenue streams. Our team combines technical excellence with strategic insight, delivering solutions that meet the highest standards for quality, security, and business impact.

AGENTIC GAMING INTELLIGENCE FOUNDRY

The AI-powered intelligence platform for gaming companies. Unlock player insights, drive engagement, and boost retention.

Agentic Gaming Intelligence Foundry is the core intelligence layer that connects and correlates your business data across marketing and community, game development and R&D, platform and infrastructure, and publishing and licensing. Powered by advanced AI and unified data intelligence, Agentic Gaming Intelligence Foundry breaks down silos to proactively surface risks and opportunities that drive player retention, engagement, and monetization. So your teams can focus on what matters most—creating unforgettable customer experiences.

- **Real-Time Churn Prediction:** Instantly identify at-risk players and trigger personalized retention campaigns
- **Unified Intelligence Layer:** Aggregate data from multiple sources for a 360° view of player behavior

- **Personalized Engagement:** Deliver tailored offers, content, and experiences to boost loyalty and lifetime value
- **Seamless Integration:** Built on Azure, compatible with PlayFab and Microsoft cloud services
- **Actionable Insights:** Intuitive dashboards and natural language queries for business and technical teams
- **Monetization & Growth:** Optimizing in-game experiences and revenue models with unified data intelligence
- **Cross-Platform Complexity:** Seamless integration across cloud, console, and mobile ecosystems

Agentic Gaming Intelligence Foundry enables studios and publishers with the tools to understand, engage, and grow their player base—turning data into action and experiences into revenue.
